Skill and responsiveness of the instructor

Course content

What aspects of this course were most useful or valuable?

7 responses

Latex as an option to word

Everything about Latex

Flow and intuitive

Custom commands and multi-page tables

I feel Latex will be very useful in writing academic work. It's very new to me but I have started practicing & found it learnable.

I was completely new to Latex and the course has familiarized me with the system well enough. Now I can start learning it on my own.

Understanding of code and its structure

How would you improve this course?

7 responses

If we can go more systematically

More time for examples and class assignments

Very well organized course. Maybe an extra session or two to elaborate more on each topic would help

By spanning the content across more classes.

More discussion on tables.

Including tables uploaded as separate files.

Usage of R markdown.

one/two more classes can be added to give more exposure

Allocating more times for the course so that we can do small small exercises in
